| Novelty (N) | Claims 1-8 | YES |

| Inventive step (IS) | Claims 1-8 | YES |

2. Citations and explanations (Rule 70.7)

The closest prior art (DE-A-101 33 092) is described in detail by the applicant on page 2 of the introductory part of the description and corresponds to the preamble of claim 1.

Problem: to provide a lock for vehicle doors or flaps which can be adapted to various vehicle conditions and is less expensive to make.

Solution: the problem is solved by the characterizing features of claim 1, according to which a toggle link lever pair which supports a resilient catch at a free end is provided between the eccentric and the rotary latch.

The searched prior art does not suggest designing the known lock in this way.

The subject matter of claim 1 appears to meet all the requirements of PCT Article 33(2) to (4).

Dependent claims 2-8 contain advantageous developments and design details of the subject matter of claim 1.
